edge computing -
process the data
where it is created

factory machine **failure detection** case

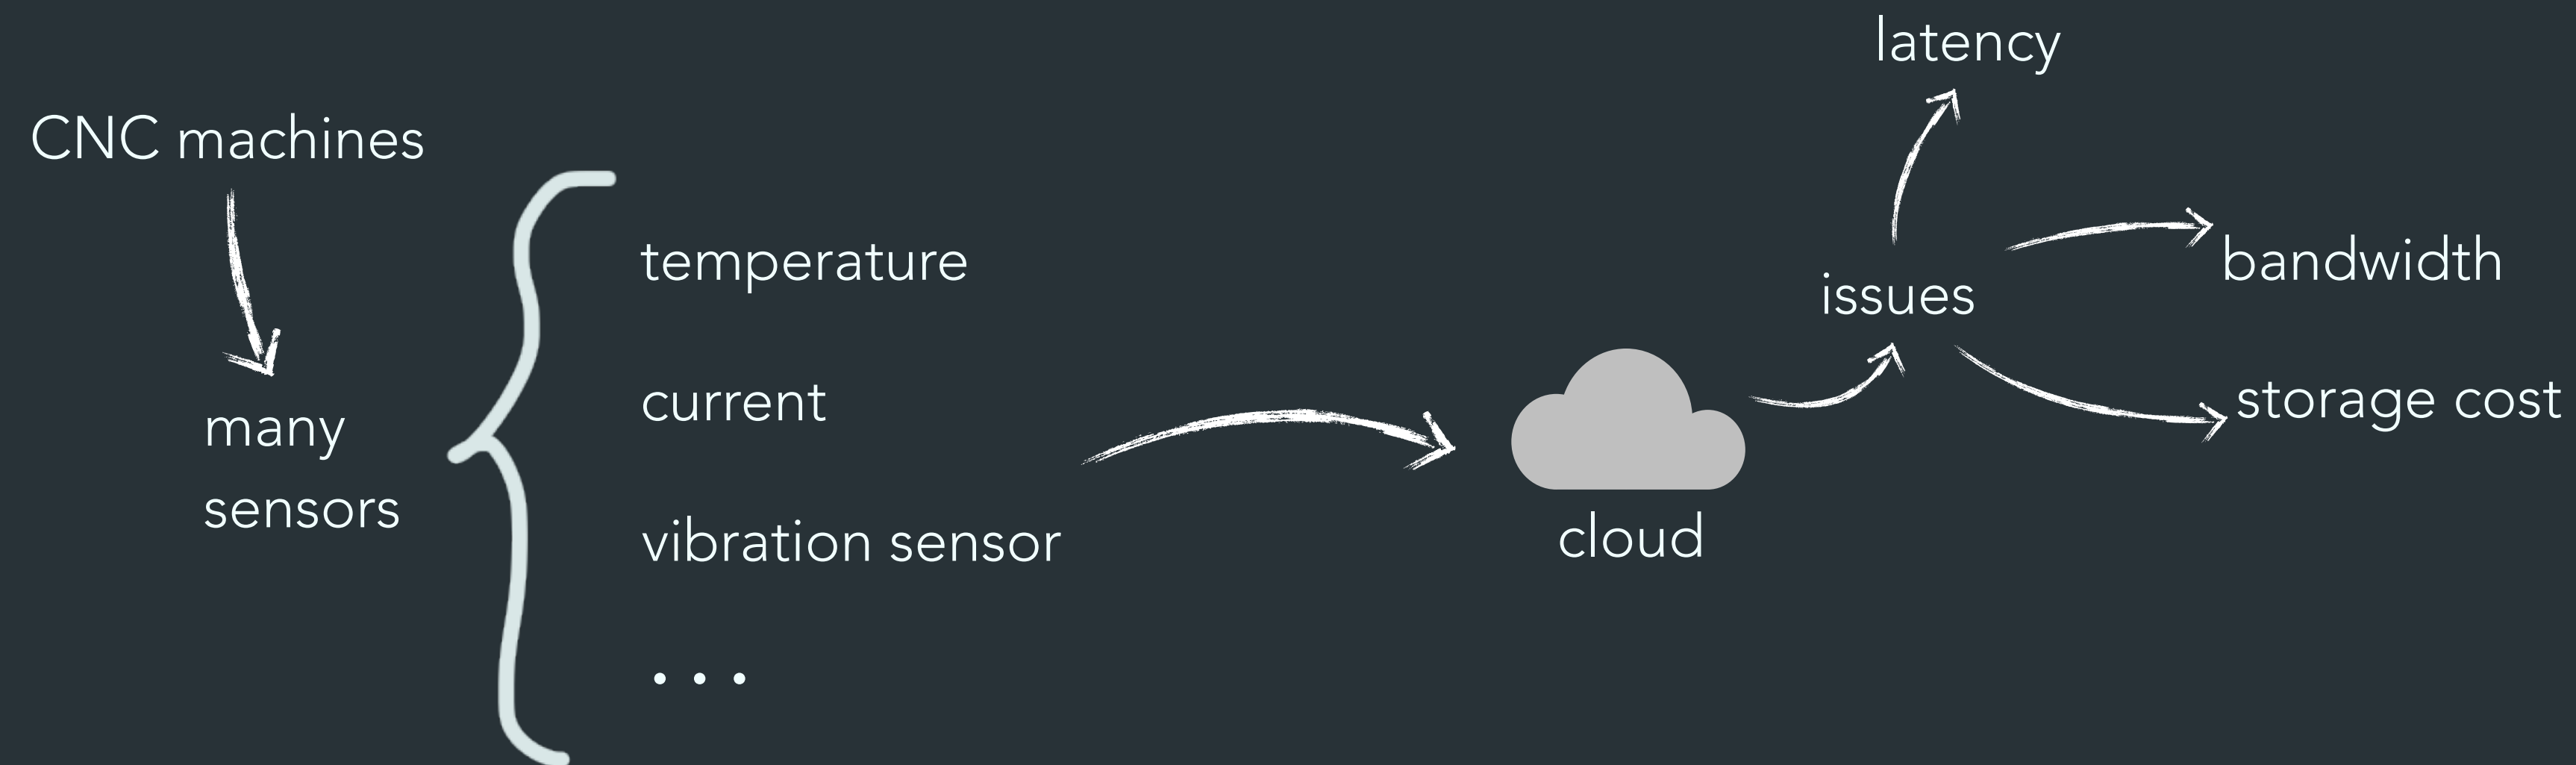

problem scenario

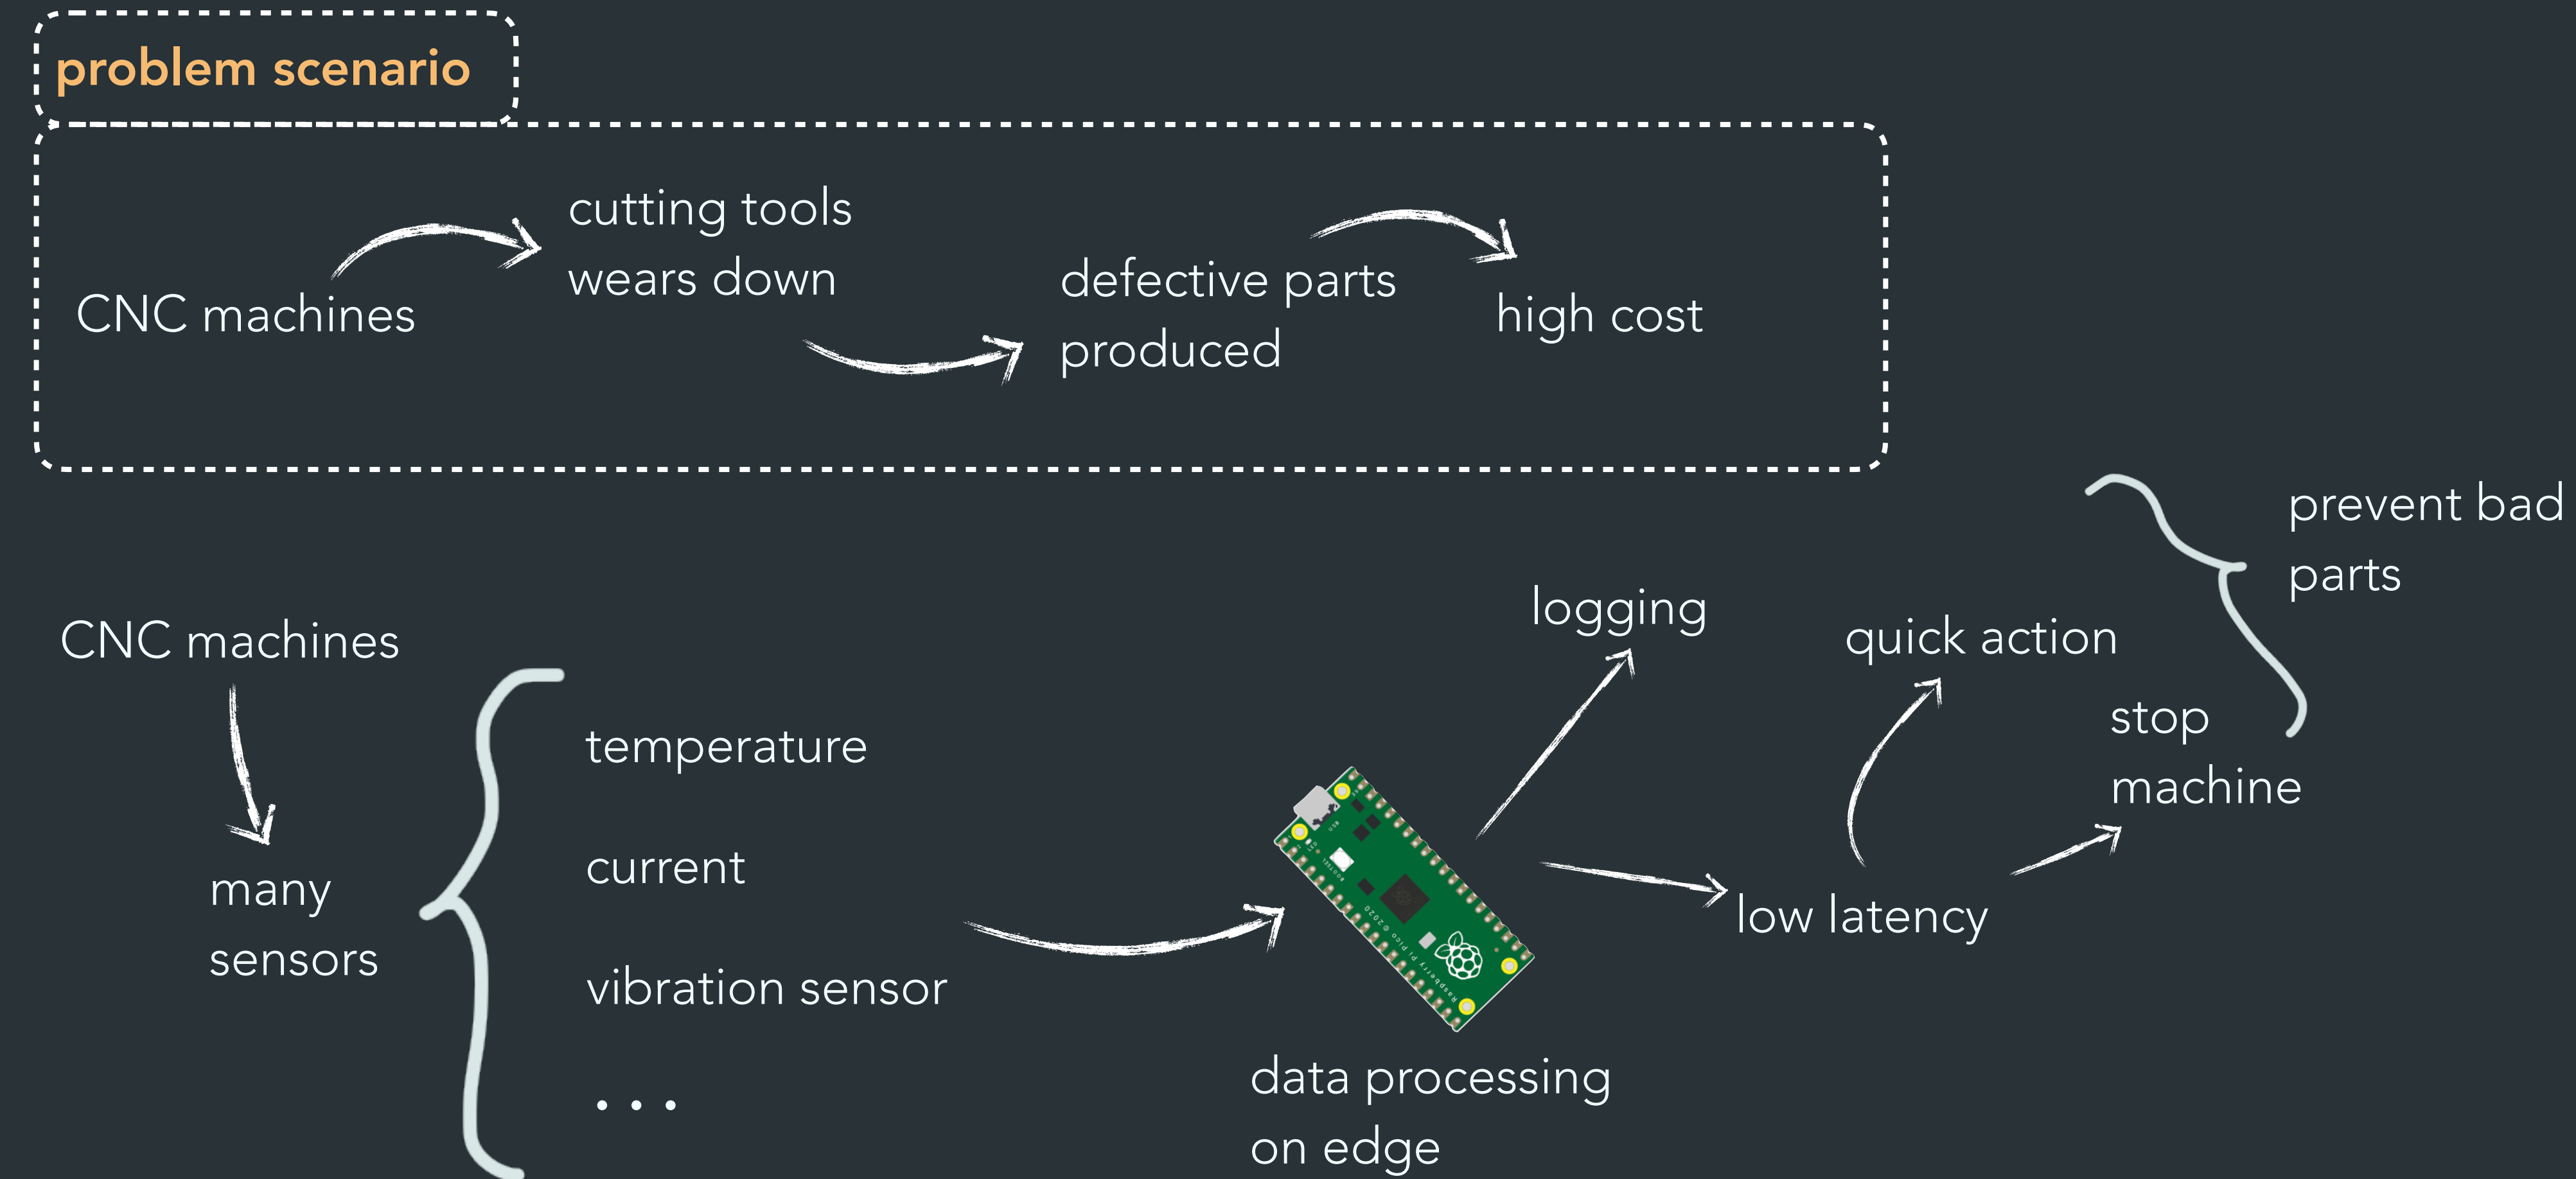

factory machine **failure detection** case - cloud computing

problem scenario

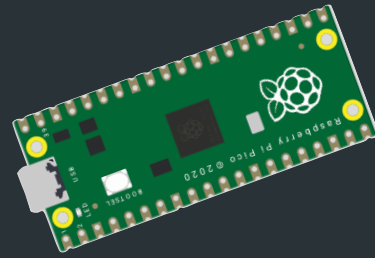

factory machine **failure detection** case - edge computing

in this **edge computing course** you will learn

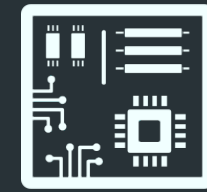

raspberry
pi pico

electrical
components

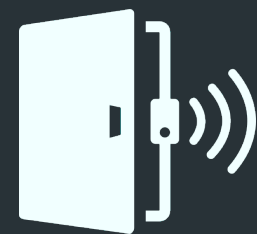

build
circuits

micropython

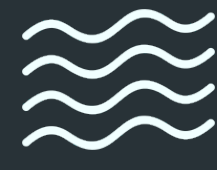

sensors

networking

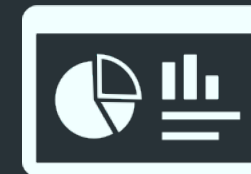

mqtt
streaming

data pipeline

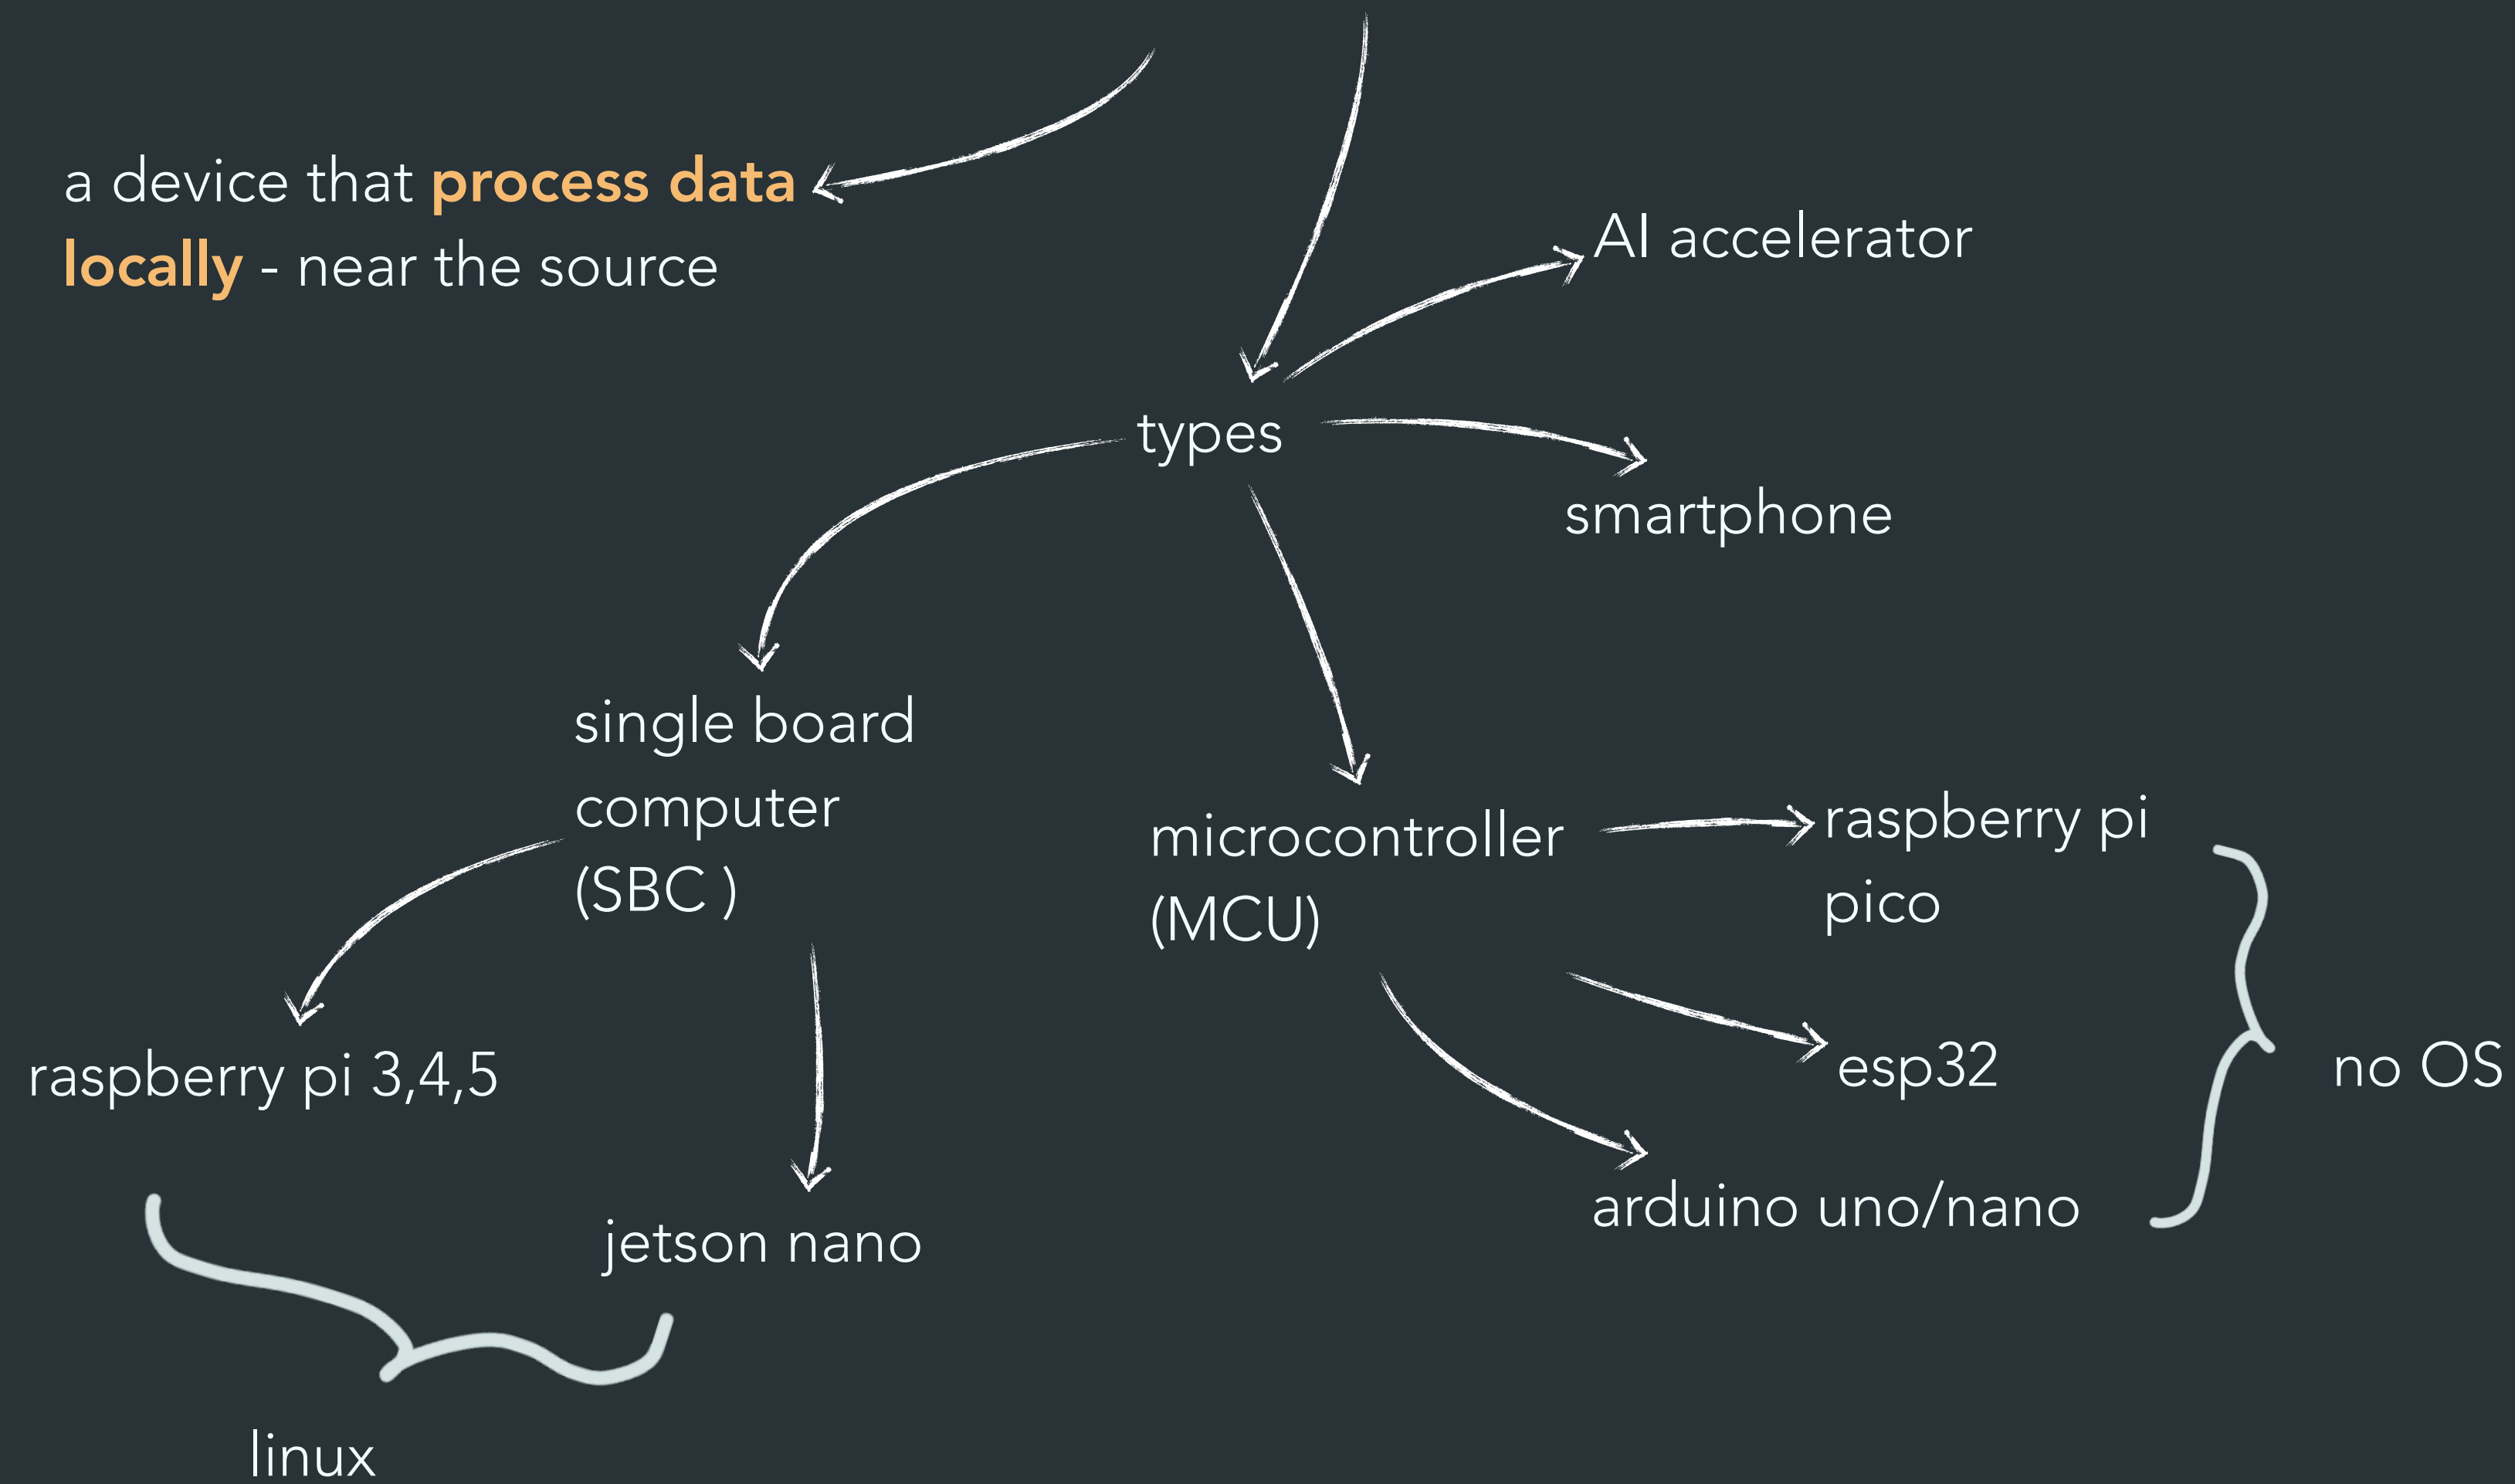

monitoring

different types of **edge devices**

a device that **process data**
locally - near the source

different types of **edge devices**

a device that **process data**
locally - near the source
